RE: ARARs for the South Cavalcade Site

FROM: James F. Pendergast *JFP*
Remedial Project Manager (6H-EE)

TO: South Cavalcade files

EPA is considering the state ARARs from the North Cavalcade CERCLA site to be the same for the South Cavalcade site. The two sites are separated by Cavalcade Street. Both sites were used for wood preserving using the same methods, and the contamination of the two sites is similar. Therefore, any ARAR for North Cavalcade would also be an ARAR for South Cavalcade.

On September 24, 1987, I requested state ARARs from the Texas Water Commission (TWC) for the North Cavalcade CERCLA site. The TWC replied on December 21, 1987, by mailing response letters from other state agencies and the TWC requirements for surface waters. These documents are listed below.

Oct. 15, 1987: Letter from J. Brown transmitting
Harris-Gavelston Coastal Subsidence District rules

Nov. 4, 1987: Letter from J. Mullican
transmitting Texas Railroad Commission rules

Nov. 19, 1987: Letter from L. D. Thurman
transmitting Texas Department of Health rules

Nov. 21, 1987: Letter from L. E. Pewitt
transmitting Texas Air Control Board rules

Nov. 21, 1987: Letter from J. Brown transmitting
Texas Water Commission rules
